

There are approximately 16,000 DOE Federal employees, dispersed throughout DOE, the power marketing administrations, the energy technology center, Headquarters, operation and field offices.

FEOSH programs are mandated by 29 CFR Part 1960, Section 19 of the Occupational Safety and Health Act, and Executive Order 12196. DOE's FEOSH program requirements are contained in DOE Orders 440.1A, 341.1, and HQ Order 442.1.

The Department of Energy (DOE) Office of Environment, Safety and Health (EH) Federal Employee Occupational Safety and Health (FEOSH) Program web site is your connection to current safety and health news and issues, Departmental special emphasis initiatives, upcoming activities, resources, contacts, and more!

The FEOSH Program supports line management through the transfer of pertinent information, guidance, technical expertise, assistance, and program evaluation tools. The FEOSH Program operates successfully through continued open communication and effective partnerships among management, professionals implementing FEOSH Programs, and labor organizations. Together, we are fundamentally committed to activities that: (1) ensure the safety and health of DOE Federal employees; (2) maintain a strong partnership with Departmental FEOSH Programs, labor organizations, and other Federal agencies; (3) recognize and respond to safety and health concerns; (4) focus on value-added activities; (5) conserve Departmental resources and, (6) build on the experience of others.

Safety and Health

## Background

The Department of Energy (DOE) Office of Environment, Safety and Health (EH) Federal Employee Occupational Safety and Health (FEOSH) Program provides resources for guidance, and technical assistance to Departmental FEOSH Programs. Working in partnership with field personnel, EH also develops special emphasis, safety, and health initiatives designed to be pro-active and preventative in nature.
